

Estimated percent change in the number of people between 2000 and 2007.

SOURCES: Claritas, US Census

MEAN: 4.66

DESCRIPTION: Estimated percent change in the count of population between 2000 and 2007. Percent change calculations showing change between two years were suppressed in cases where the value in either year was less than 10. These areas are represented as having "Insufficient Data" in the map.
